## About This Content

Boasting over 570 km of truly rapid inter-city travel, the Southwest China High Speed Network, available for Train Simulator, is a wonder in and of itself; watch high-flying viaducts and scenic valleys soar past as you embark on one of the fastest sets of rails in the world courtesy of Partner Programme Developer Just Trains.

China has the largest High Speed Rail network in the world, with new, passenger-dedicated lines spanning a phenomenal 22,000 km across the mammoth nation, whisking millions of passengers between 29 of the country's Provinces at speeds in excess of 350 km/h.

This vast network began in 1997 when a radical series of 'Speed Up' campaigns were undertaken to improve the sorry-state railways of China. Diesel-powered passenger trains were forced into sharing tracks with freight across the country, and when combined with the limiting topography that governed the network, many services were losing out to road and air traffic.

Between 1997 and 2004, five total 'Speed Up' campaigns were undertaken. Extra track was laid, many routes were electrified, steep grades were shallowed with tunnels and viaducts plus much more. By December 1994, the Guangzhou-Shenzhen Railway was operating at 160 km/h, the first line to offer such a speed – only years later, this would be increased to 200 km/h post-electrification. This railway was also the first to separate freight and passenger operations, this was made possible in 2000 and 2007 by opening a third and fourth track; for sure, the Guangzhou-Shenzhen Railway served as a model for what the whole country was destined to become.

By 2007, the first high speed rail lines had been completed, allowing for 250 km/h operation. Following the initial success, new routes would start sprouting across the country, and it wasn't long before 350, even 380 km/h service was possible between the

---

prominent cities and regions of China.

To lessen the impact on journey times, and to avoid the costs of land acquisition, a significant percentage of the Chinese High-Speed Railway network is built upon vast viaducts. Similarly, many tunnels are also present, further keeping the track as level as possible for the trains that cut through the landscape.

By 2011, passenger numbers had surpassed those of the major short-haul local flights, which found themselves all but replaced by high speed rail; people would opt to travel on the cheaper and hassle-free journeys through the countryside. Fast forward, and China's high speed railway network handled over 1.44 Billion passengers in 2016, a record-breaking feat.

In order to operate this vast network, China was in need of various high speed train designs that would be capable of rapid acceleration, maintaining comfort, and above all – achieving high speeds. Ensuring local self-sustainability in the Chinese manufacturing plants, technology transfers were requested as part of the rolling stock bid; this would allow foreign successes to be utilised on the growing high speed lines.

One company in particular, Bombardier, had been sharing technology with China since 1998 and was able to provide their Regina family for 250 km/h operations on the new dedicated high speed lines. Construction of the new EMUs, which were classified as the CRH1A, was a joint venture between Bombardier and China's manufacturers and a total of 186 8-car units exist today. Another of Bombardier's designs, based on their Zefiro 250 family, was ordered as the CRH1E; a 16-car high speed sleeper EMU, the first of its kind in the world.

From Just Trains, the Southwest China High Speed Network delivers the breath-taking experience of racing through 570km-worth of Chinese valleys and hills.

## **Included Rolling Stock**

- CRH1A EMU
- CRH1E EMU

## **Included Scenarios**

The Southwest China High Speed Network includes 15 challenging scenarios:

### **Career**

- CRH1E-1. Night Express
- CRH1E-2. Short commuter run
- CRH1E-3. Evening Express

### **Standard**

- CRH1A-01. Introduction to CRH1A
- CRH1A-02. Fast Service to Jijin
- CRH1A-03. Bad weather run
- CRH1A-04. Short passenger run
- CRH1A-05. Night express
- CRH1A-06. Commuter service

- 
- CRH1A-07. Evening Express to Nanchong
  - CRH1A-08. Wusheng to Suining Express
  - CRH1A-09. Guang'an to Nanchong Express
  - CRH1A-10. Chongqing to Wusheng
  - CRH1A-11. Suining to Chongqing North
  - CRH1A-12. Chongqing North to Nanchong

More scenarios are available on Steam Workshop online and in-game. Train Simulator's Steam Workshop scenarios are free and easy to download, adding many more hours of exciting gameplay. With scenarios being added daily, why don't you check it out now!

## Key Features

- 570km high-speed network in Southwest China
- Chengdu – Suining: 146km
- Suining – Chongqing: 156km
- Suining – Nanchong: 63km
- Nanchong – Chongqing: 170km
- Wusheng – Guang'an: 35km
- Two modern high speed trains
- 15 challenging scenarios covering the vast route
- Quick Drive compatible
- Download size: 552.6mb

The yz450f is crazy fast! i like that it handles great, the kx450f doesn't handle quite like this, the kx450f is a nice bike and there's guys who are pros on them but it just doesn't handle like this bike, the power is so nice! so go grab one and try it out!!!. A very nice reincarnation of Super Hexagon.

If you liked SH, then Get it, get it now!. fun rts/space settlement sim. outstanding game. I Nominated for an award. Very relaxing <3..great graphics..great game play and controls. I must say, its pretty good.. I was asked to review/play this game, in return for a free copy. This is my honest review of the game, and I must say it surprised me, I really enjoyed playing this. It's very relaxing at first, love the music, as you progress though it gets harder and you have to start thinking a bit more. Overall well worth the money to purchase the full game.

<https://youtu.be/tGg8E0HixyQ>. Imagine a kind of really bad and simple puzzle Portal game where you run through company rooms like in The Stanley Parable for no reason. So not fun.. I don't even know why Steam allows such poorly made games on its platform, the quality of these games is almost unbelievably low.. Really bad cheating poker game.

There was a girl, I called her the "Flush Queen™". There was no way to win against her...

---

I still have the original CDROM.. It was the first game I bought. I bought the steam version for nostalgic reasons.. It was a pretty nice game back then. The story isn't bad and the music is nice. The voice-acting is good, especially when you think of the time this was made.. i cant get past the make a profile and i♥♥♥♥♥♥♥♥ what to do. A very beautiful game, with a touching story. My brother rabbit combines light adventure work with light puzzling and hidden object tasks, while presenting you with a stunning scenery and a beautiful soundtrack. Clearly aimed at younger children, the concept and especially the execution are both timeless and captivating for all ages. Certainly a recommended game if you have children, but do play it together since it is also just plain fun for everyone.. I'll just add my voice to the others. Really great! I feel like Indiana Jones. Had fun scary moments. Like others have said, would like to have the trackpad motion capability without the arm swing. Great atmosphere. We have over 200 titles and have spent more time in here than anywhere else. Great bargain!. If anyone remembers watching the old Looney Tunes cartoons where some crazy contraption was created to cause mayhem to some unsuspecting character, you'll enjoy this game. And if you didn't, you'll still enjoy it!

I never knew of the mobile version, so I went in pretty new. I can see how it was a mobile game based on how the controls worked, but it wasn't too difficult using a mouse. The developer might be looking into options to make it a bit more mouse friendly, but it didn't take away any enjoyment from playing it.

The game can be addicting like chips, so you might go through it quickly just to get that "one more" puzzle done, so I try to play only 1 or 2 puzzles a day to extend my enjoyment from it.

Very fun game to play at a great price and across three platforms.

Now, excuse me, I have to find a cat, a rubber ball, some cheese, a hamster, wet socks, a plate, some string, and a scale...I seemed to have misplaced my keys.
